4medica is the nation’s leading provider of the web-based Integrated Electronic Health Record (iEHR) designed to create easy access to real-time, patient-centric, multi-organizational, multi-modality clinical data from multiple inpatient and outpatient sources.

Starting out as a lab outreach connectivity company, 4medica has expanded its offerings into an Integrated Electronic Health Record (iEHR) that helps hospitals and physician practices leverage existing technology platforms to provide Clinical Integration with an easy to deploy, easy to use application. Its IHR application suite, which was developed in collaboration with physicians, has already received unrivalled acceptance and adoption because of its powerful, yet intuitive functionality, coupled with its demonstrated ability to help reduce costs, improve quality of care and favorably impact clinical outcomes. 4medica continues to build on its success in connecting over 100 institutional customers with over 40,000 physicians.

We are currently seeking an **Interface Engineer** to support and implement integration between healthcare systems. This position is located in our Eugene, Oregon office.

**Job responsibilities include the following:**
- Develop, test and implement interfaces based on customer requirements.
- Maintain and support existing interfaces.
- Analyze and document customer requirements and business workflow for integration of disparate healthcare systems.
- Perform and document interface gap analysis.
- Configure and test new interfaces between healthcare groups.
- Document interface implementations and configurations.
- Provide excellent customer service and maintain excellent customer relationships.
- Identify and resolve interface related issues in a timely manner.
- Communicate with customers and technical staff to implement, test, and support constant improvement in processes and technology for interfaces and infrastructure components.
- Be willing to carry a pager/cell phone and be available for 24x7 on-call support to include weekdays, evenings, weekends, and holidays.

We are looking for a unique person with the following qualifications:
- Extensive knowledge of HL7 protocol at the specification and programmatic level.
- More than 5 years of system integration experience in healthcare environment.
- Excellent people/customer relationship skills.
- Experience with integration engine technologies.
- Excellent systems thinking and solution orientation.
- Ability to clearly document interface specifications and configurations.
- Bachelor’s degree in Computer Science or equivalent.
- Broad based knowledge of computer OS, applications and networking technologies.
- Experience working with multi-tiered web-based ASP solutions.
- A self-motivated quick learner who works well with other members of the team.
- Well organized and detail-oriented.
- Capable of juggling multiple concurrent tasks successfully.
