This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments.

This certified product-version may require fees to establish interfaces for reporting to registries, public health agencies, and transmission of reportable laboratory tests. At this time there is no established standard adopted nationally by public health registries and laboratory testing companies that includes a uniform file specification, communication protocol and testing process for EHR vendors, therefore this certified product-version may require either a one-time and/or monthly fees for custom development work to establish custom interfaces to the above captioned entity types.

There are no fees related to exporting public health data from this certified product-version in file formats that meet the specific standards that were required to meet the CEHRT definition at the time this product version was certified and no fees related to Medline Plus for educational materials and the required use of the Nitor-HISPDirect, Adobe Acrobat, Lexicomp and Surescripts network for clinical interoperability.

There are no known limitations that a user may encounter in the course of implementing and using this Complete EHR's capabilities, whether to meet meaningful use objectives and measures or to achieve any other use within the scope of the health IT's certification.
