

# 4medica Mobile Application

## Mobile Access to Real-time Patient Data

### Anywhere, Anytime Access to Patient Data

4medica's Mobile application delivers 24x7 physician access to patient data via iPhone®, iPad®, BlackBerry® 6+ and Android™ smartphones and tablets. Whether performing hospital rounds, seeing patients at the office, or reviewing clinical test results remotely, physicians can access a unified view of patient information to support improved clinical decision-making and patient outcomes.

### Superior Patient Safety & Care

- Remote access to laboratory, pathology and radiology results
- Real-time access to patient demographics
- Review of medical notes
- Access to patient lists
- Ability to see trending data from multiple sources
- Seamless integration of patient data across disparate care settings
- Enables physicians to access patient test results in real-time, eliminating costly duplicate testing and quickly identifying patients at risk

### Meaningful Use & ACO Ready

The 4medica Mobile application leverages 4medica's cloud-based SaaS clinical integration platform to aggregate patient data across diverse care settings. Our intelligent clinical integration engine transforms patient data into actionable information, supplying physicians with an intuitive interface and advanced decision support tools that support evidence-based medicine, cost-effective care and enhanced patient safety – key provisions of meaningful use and healthcare reform legislation.

### Best of Both Worlds: EHR & Health Information Exchange

If facilities have already deployed a certified EHR, they can take advantage of 4medica's Mobile application for inpatient and ambulatory data access, ePrescribing, laboratory, radiology, and pathology to ensure complete HIE connectivity for their organizations.

### Why 4medica?

#### Cloud-based SaaS EHR Expert

- Can be deployed in as little as four months, without high capital investments or workflow disruption.
- Physician-designed, browser-based iEHR ensures high physician adoption, resulting in greater clinical, operational and financial efficiencies.

#### Ambulatory & Inpatient Solutions

- Customized solutions for ambulatory and inpatient care providers.
- We supply a comprehensive EHR system and HIE platform that enables organizations of any size to quickly demonstrate meaningful use and qualify for ARRA incentives.

#### Cost-effective Interoperability

- Our technology-agnostic iEHR platform offers full clinical data integration with all the major EMRs, PMS, radiology clinics, labs and other ancillary services.
- The 4medica cloud SaaS model ensures maximum flexibility and scalability to meet future industry or government demands.
