

GetPatientRecords

by RosettaHEALTH

Access Patient Records. Instantly.

Empowering health teams to build faster,
deliver better care, and drive innovation.

Patient data is everywhere.

The data does exist. The challenge is the barrier of access it when you need it.

Multiple connections

Different systems, networks, and data sources.

Complex integrations

Time and resources spent building and maintaining.

Manual retrieval

Calls, faxes, portals, and staff intervention

Delays that impact care

Creates critical problems.

One Connection. Nationwide Access.

Unlock real-time access to structured medical records from thousands of health systems across the US through a single connection.

Your System

GetPatientRecords
by RosettaHEALTH

**Nationwide
Health Systems**

**Patient
Records**

Built by healthcare veterans with over 20 years of connecting systems for 100+ organizations and facilitating the secure exchange of over 40 million medical records monthly.

Spend More Time Using Data, Not Finding It.

GetPatientRecords provides the essential infrastructure for modern health data access:

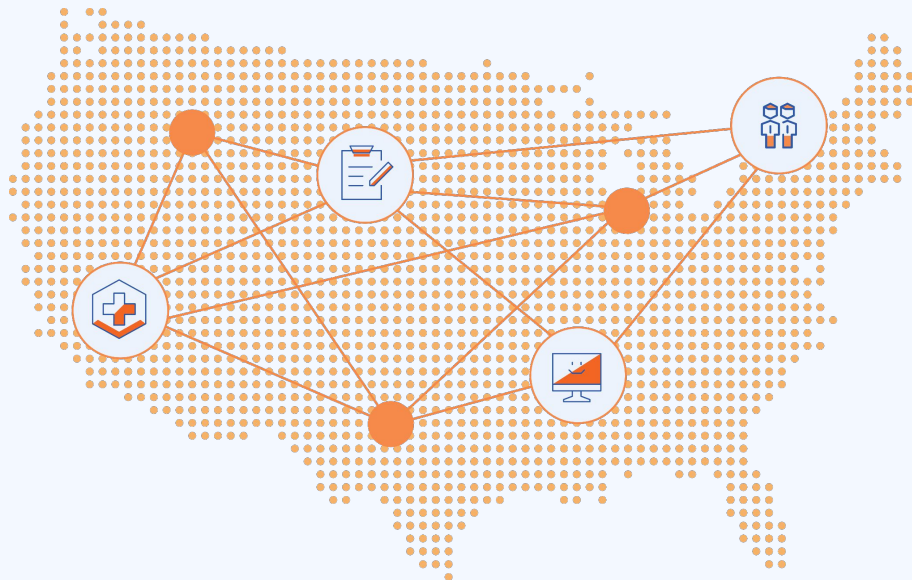

Nationwide Reach: Connect to thousands of healthcare data sources

High Data Accuracy: Optimized for matching and completeness

Developer Friendly: Simple API built into your existing workflows

Fast to launch: Go live in days, not months.

HIPAA Compliant: Enterprise-grade security standards

GetPatientRecords

by RosettaHEALTH

Tell us your use case.
We'll show how fast
it works.

Unlock the power of real patient data to transform
your operations, enhance patient care, and
accelerate your innovation.
